Please reject the NAB's petition 04-160. The traffic/weather on XM is a wonderful feature to have on my radio. Not only will the wather reports help people avoid dangerous weather they also put on the Amber Child alerts. The XM radio display can show the license plate number and other info to help resue and abducted child. This has already happened in Florida.
Please reject the petition and leave XM keep this needed service.

Sincerely,
Robert Sheldon
